DESCRIPTION

Camden Door Controls CM-3000/3100 Series Exit Switches are heavy duty push-buttons designed for industrial and commercial applications, where illumination is required. Buttons are 1 5/8" (40mm) in diameter, and are available in red or green (other colors on request) The faceplate is 1/4" thick brushed aluminum, in 1 3/4" or 2 3/4" widths. Optional duranodic (US 40) finish is also available.

The switches are UL/CSA approved, rated 10 amps @ 30V DC, either momentary or maintained operation.

APPLICATION

Camden illuminated Exit Switches are ideal for high traffic areas such as building front entrances and exits, as well as institutions such as hospitals where an illuminated button is required. They can be surface, flush, or mullion (narrow stile) mounted.

Camden Illuminated Exit switches are designed to control electric locks, electro-magnetic locks, electric strikes, automatic doors, and handicap operators. They may also be used for automatic doors, shunting, bypassing alarms, request to exit, timed functions, and many other applications.
